# **Survey Narrative**

### COLORADO STATEWIDE MULTIFAMILY RENTAL MARKET SURVEY 4<sup>th</sup> QUARTER 2024

This Colorado Statewide Multifamily Rental Market Survey (the "Survey") is researched and authored by Erin Shumaker and Scott Rathbun of 1876 Analytics LLC (1876 Analytics), an affiliate of Apartment Appraisers & Consultants, Inc., and is sponsored by the Colorado Housing and Finance Authority (CHFA). Users of this Survey (the "Users") should review and understand the Methodology and Assumptions, as well as the Terms of Use, set forth below.

CHFA's mission is to strengthen Colorado by investing in affordable housing and economic development. As a service to the multifamily housing industry in Colorado, CHFA sponsors this Survey in order to help provide Users with up-to-date information, as of the date of this Survey, on the multifamily rental housing market throughout the state of Colorado.

1876 Analytics conducts this quarterly statewide survey in selected markets throughout Colorado and utilizes data from Apartment Insights for the Front Range markets (specifically Fort Collins, Loveland, Greeley, and Colorado Springs). In this report, 1876 Analytics analyzes and summarizes the quarterly rents and vacancies of market rate multifamily rental properties in the following markets (the "Survey Area"), including nearby areas where applicable: Alamosa, Summit County, Cañon City, Colorado Springs Metro Area, Craig, Durango, Eagle County, Fort Collins Metro Area, Fort Morgan/Wiggins, Glenwood Springs Metro Area (excluding Aspen/Snowmass), Grand Junction Metro Area, Greeley Metro Area, La Junta, Montrose/Ridgeway/Delta, Pueblo Metro Area, Steamboat Springs/Hayden, Sterling, and Trinidad. *Note that the seven county Denver metro area is not covered by this Survey.* Additional market areas could be added in the future if deemed appropriate.

In the past, the Colorado Division of Housing (DOH) sponsored a statewide survey similar to this Survey. However, the final statewide DOH survey was issued in the 2<sup>nd</sup> quarter of 2020 and was subsequently cancelled. While there are similarities between the previous statewide DOH survey and this Survey, they utilize different methodologies and cover different geographies. As such, Users of this Survey should be careful when attempting to compare results from the previous statewide DOH survey and this Survey. The final statewide DOH survey for the 2<sup>nd</sup> quarter of 2020 included a total of 35,691 units. This Survey, for the 4<sup>th</sup> quarter of 2024, includes a total of 73,200 units, up from 68,549 the previous year (and up from 71,134 the previous quarter).

### **EXECUTIVE SUMMARY – STATEWIDE SPOTLIGHT**

After thriving during the pandemic in 2020 and 2021, multifamily properties throughout Colorado continued to perform well in early 2022, especially compared to other types of commercial real estate. And while Colorado continued to be ranked among the top multifamily markets in the country, many markets throughout Colorado, as well as nationally, began to experience softening rent growth and increasing vacancy in the second half of 2022, which continued throughout 2023 and into 2024. Combined with the relatively high interest rates and legislative challenges, among other issues, some apartment markets throughout Colorado are likely to continue slowing or remain relatively flat in the near term. While it appears that the Federal Reserve may have achieved the targeted "soft landing,"

such slowing would be further exacerbated by a recession. Further, there is uncertainty in the markets due to the significant changes being made by the new Presidential administration.

Even in light of possible softening, because of generally strong market fundamentals and continued affordability issues in the for-sale markets throughout both the state and nation, including high interest rates that exacerbate the existing affordability problems, we expect the ratio of apartment permits and multifamily renter ratios to continue to remain high, and likely increase, in most areas throughout 2024. This, combined with decreasing renter household sizes and decreasing homeownership rates, demand for apartments is expected to remain high and likely increase.

As a result of such headwinds, the statewide Average Rent and Median Rent, discussed below, both decreased by 0.3% year-over-year.

### Vacancy

The average statewide vacancy (6.3% in the 4th quarter of 2024), which is heavily driven by the large Front Range markets, is down approximately 8 basis points from the previous year and up 73 basis points from the prior quarter. This is consistent with large increases in vacancy QoQ in Colorado Springs, Northern Colorado, and the Denver Metro Area (which is not included in this Survey).

Vacancy throughout the Survey Area in the 4<sup>th</sup> quarter of 2024 ranged from 0.3% in Alamosa to a high of 11.8% in La Junta. Areas with vacancy above a 6% stabilized level, not including individual submarkets, include Sterling (7.3%), Colorado Springs (7.4%), Craig (8.8%), and La Junta (11.8%). Overall, vacancy appears to generally be similar to the prior year, but generally increased quarter-ove-quarter, which is not unusual based on seasonality.

During the 4th quarter, vacancy increased from the prior year in 7 of the 18 geographies surveyed, fell in 10 geographies, and remained the same in one geography. As stated above, only 4 markets had vacancies above 6%, although Fort Morgan/Wiggins and Trinidad both had vacancies between 5% and 6%. While vacancy fell slightly along the Front Range and increased in both the Non-Metro and Mountain areas, vacancy remains low in those areas, well below a 5% to 6% stabilized level.

As indicated, vacancy along the Front Range was generally the highest, ranging from 2.9% in the Pueblo South submarket to 9.1% in the Colorado Springs South Central submarket. The weighted average vacancy for all Front Range properties was 6.7%, down 19 basis points from the prior year (up 78 basis points QoQ). Average vacancy in the Non-Metro Areas was 3.3%, up 117 basis points from the prior year (up 22 basis points QoQ). Finally, average vacancy continued to be the lowest in the Mountain/Resort Areas, with vacancy ranging from 0.5% in Summit County to 4.0% in Durango. The weighted average vacancy for all Mountain/Resort Area properties was 2.8%, up 67 basis points from the prior year (up 47 basis points QoQ). Historical vacancy trends for each of these areas is shown on the graph on the following page.

Although not discussed here, vacancy by unit type, vacancy by age of property, and vacancy by property size are all available on the pages that follow.

### **Average Rents & Median Rents**

Statewide, the Average Rent and Median Rent decreased slightly year-over-year, both down 0.3%. Further, both Average Rent and Median Rent fell quarter-over-quarter, Average Rent down by 1.5% and Median Rent down by 0.5%. Specifically, statewide Average Rent in the 4<sup>th</sup> quarter of 2024 was \$1,507 per month, down \$5 (0.3%) year-over-year and down \$24 (1.5%) quarter-over-quarter. The Statewide Median Rent was \$1,491 per month, down \$4 (0.3%) year-over-year and down \$8 (0.5%) quarter-over-quarter. The current Average Rent is \$32 higher than the Median Rent. Statewide, Average Rent increased in 15 of the 18 markets surveyed year-over-year, with increases ranging from 0.3% to 26.6%. Geographies with annual rent growth in excess of 10% included Craig (26.6%) and Montrose/Delta/Ridgeway (18.0%). Average Rent was down year-over-year in 3 markets, including Pueblo (-\$14 or -1.2%), Fort Collins (-\$21 or -1.2%), and Colorado Springs (-\$26 or -1.8%). Statewide, Median Rents decreased in 11 of the 18 geographies, remained flat in 3 of 18, and increased in the remaining 4 of 18. The declines occurred in Steamboat Springs/Hayden (-4.0%), Colorado Springs (-3.0%) Durango (-2.6%), and Fort Collins (-.01%), while the largest increases occurred in La Junta (10.0%), Eagle County (10.5%), Craig (11.8%) Grand Junction (13.9%), and Glenwood Springs (excluding Aspen/Snowmass) (16.4%).

Overall, Average Rents throughout the Survey Area in the 4<sup>th</sup> quarter of 2024 ranged from \$778 per month in La Junta to \$2,900 per month in Eagle County. Median rents ranged from \$825 in La Junta to \$3,950 in Eagle County.

Along the Front Range, Average Rents ranged from \$945 per month in the Pueblo South submarket to \$1,732 per month in the Fort Collins South submarket, while Median Rents ranged from \$939 in Pueblo South to \$1,700 in the Fort Collins North submarket. Average Rents in the Mountain/Resort Areas ranged

from \$1,684 in Durango to \$2,900 in Eagle County, while Median Rents ranged from \$1,666 in Durango to \$3,095 in Eagle County. Finally, Average Rents in the Non-Metro Areas ranged from \$778 in the La Junta area to \$1,556 in the Fort Morgan/Wiggins area, while Median Rents ranged from \$825 in La Junta to \$1,595 in Fort Morgan/Wiggins. Note that rents in the Fort Morgan/Wiggins area are high compared to other Non-Metro Areas because the average age of property surveyed in Fort Morgan/Wiggins is much newer (on average built in 2021).

As discussed in the "Inventory" section below, the statewide Average Rent and Median Rent are significantly driven by the largest Front Range markets, including the Colorado Springs MSA and the Fort Collins MSA (Fort Collins and Loveland), and to a lesser extent the Greeley MSA and the Pueblo MSA. The Colorado Springs and Fort Collins MSAs together account for 73.5% of the total apartments in the Survey, although that ratio has fallen from 77.5% since the inception of this Survey in the 1<sup>st</sup> quarter of 2022.

We note that swings in rents in these markets, especially the smaller geographies, may be the result of adding additional units to the Survey. For example, average and median rents would increase if a brandnew property were added to the Survey, while rents would decrease if additional units from older, less expensive properties were added. As a result, we recommend Users of this Survey utilize the two-page summaries for each of the geographies at the end of this report to verify if changes in rents may have been impacted by changes in the inventory surveyed in any given market area.

Although not discussed here, average rents and median rents by unit type, by age of property, and by property size are all available in the pages that follow.

### Inventory

As discussed above, the Front Range markets account for a large majority of the total units in the survey. Specifically, all Front Range markets account for 88.1% of the total units in the Survey. The Mountain/Resort Area markets account for 6.3% of the total units in the Survey, and the Non-Metro Area markets account for the remaining 5.6% of the total units in the Survey. The total inventory surveyed this quarter increased by 4,651 units year-over-year (2,066 units quarter-over-quarter), partially in new apartment communities that were added to the Survey once they reached stabilization, partially in previously existing properties that more recently agreed to participate in the Survey, and to a much lesser degree due to changes in unit counts provided by leasing agents and/or property managers.

Although not discussed here, inventory by unit type, inventory by age of property, and inventory by property size are all available in the pages that follow.

### **METHODOLOGY & ASSUMPTIONS**

It is important for Users of the Survey to understand that 1876 Analytics has surveyed only market rate apartment communities, and that this Survey does not include affordable units, age-restricted units, or employee housing units. 1876 Analytics works to survey the highest ratio of market rate apartments possible, and to provide consistent data from quarter to quarter. However, it should be noted that 1876 Analytics does not attempt to survey every market rate apartment unit in every geography because to

do so would be prohibitive. Instead, we have attempted to survey the largest number of market rate apartments possible in each geography based on certain minimums for each area. For example, the data for the smallest geographies is generally based on analysis of properties with 8+ units. For moderatesized markets, including the Grand Junction and Pueblo areas, the data is generally based on properties with 24+ units. However, data for smaller properties may be included in these areas to the extent that it was easily accessible. Finally, the data for Fort Collins, Loveland, Greeley, and Colorado Springs, which has been licensed by 1876 Analytics from Apartment Insights, is based on properties with 50+ units.

In order to ensure that results from properties in lease-up do not reduce the usefulness of the data in the Survey due to high lease-up vacancy, the Survey only includes rent and vacancy information for stabilized properties. New properties are added to the Survey once they reach stabilization. For the purposes of this Survey, a property is deemed to be stabilized when its vacancy stops decreasing quarter-over-quarter.

All rents provided and analyzed are gross rents. Unless otherwise indicated, 1876 Analytics does not attempt to obtain information about concessions or net (effective) rents as part of the Survey.

The Survey assumes that rents are for unfurnished apartments, and 1876 Analytics has attempted to remove all furnished properties from the Survey. However, regarding utilities, it should be noted that 1876 Analytics does not track utilities included in rents on a property-by-property basis. As such, rents for some properties may include certain utilities, while rents for other properties may not include any utilities.

It should be noted that, while Basalt and El Jebel are technically in Eagle County, for purposes of this Survey, properties in these towns have instead been included in the Glenwood Springs geography because they have a greater impact on housing in the Glenwood Springs housing market than the housing market in Eagle County. Further, the Survey does not include any properties in Aspen/Snowmass, as the significantly higher rents in those areas would reduce the usefulness of the data for the remainder of the Glenwood Spring area.

Prior to publication each quarter, 1876 Analytics proofreads the Survey results for completeness and to identify and analyze outliers. However, we cannot guarantee that the Survey is error-free.

It is the intent of both 1876 Analytics and CHFA that this Survey will be published on a quarterly basis, and the authors will strive to maximize consistency from quarter to quarter. To the extent possible, and unless otherwise specified, rents for the 1<sup>st</sup> quarter are collected in March, rents for the 2<sup>nd</sup> quarter are collected in June, rents for the 3<sup>rd</sup> quarter are collected in September, and rents for the 4<sup>th</sup> quarter are collected in December. The quarterly surveys will be issued 6 weeks after the end of each quarter, so the 1<sup>st</sup> quarter survey will be issued on or around May 15<sup>th</sup>, the 2<sup>nd</sup> quarter survey will be issued on or around August 15<sup>th</sup>, the 3<sup>rd</sup> quarter survey will be issued on or around November 15<sup>th</sup>, and the 4<sup>th</sup> quarter survey will be issued on or around February 15<sup>th</sup> of the following year.

### OWNERSHIP, INTELLECTUAL PROPERTY RIGHTS, AND TERMS OF USE

1876 Analytics and CHFA jointly hold the copyright to this published Survey report. 1876 Analytics retains sole ownership of the data that was collected and analyzed in order to compile this summary, with the

exception of the data obtained from, and owned by, Apartment Insights, which is subject to a licensing agreement.

In conducting the Survey, 1876 Analytics relies on the cooperation of participating apartment managers, owners, property managers, and/or others (the Participants). All individual information collected by 1876 Analytics from the Participants related to each building/community is confidential, and 1876 Analytics only discloses and publishes summary data herein.

1876 Analytics relies upon Participants to provide accurate information, and the data furnished by the Participants is believed to be reliable. However, Users shall utilize and/or rely upon the information and data contained herein at their own risk. 1876 Analytics and CHFA make no warranties, express or implied, and assume no legal liability or responsibility for the inclusion of data from the Participants in the Survey, or for the use of the data from the Survey. 1876 Analytics and CHFA collaborated to make this published Survey report available for public use. It should be noted that, while Basalt and El Jebel are technically in Eagle County, for purposes of this Survey, properties in these towns have instead been included in the Glenwood Springs geography because they have a greater impact on housing in the Glenwood Springs housing market than the housing market in Eagle County.

\$3,586

\$3,427

\$3,427

\$3,589

\$4,251

\$4,476

Inventory fell by 96 units in 2Q 2024 because a property was demolished for future redevelopment. All 96 units at this older property were 2bd/1ba units leasing at relatively low rents for the area. As a result, now only newer properties with much higher rents include 2bd/1ba units, which increased the average rent for that unit type significantly in 2Q 2024.

## Fort Collins Metro Area, 4th Quarter 2024\*

Vacancy of 6.3% is 100 basis points higher YoY and 120 basis points higher QoQ. Average Rents have decreased by -\$21 (-1.2%) YoY and decreased by -\$91 (-5.0%) QoQ. Median Rents decreased by -\$2 (-0.1%) YoY and decreased by -\$78 (-4.5%) QoQ. Vacancy may be impacted by the construction pipeline.

#### **Additional Notes**

Rents in the Fort Morgan/Wiggins area are high compared to other non-metro areas because the average age of property surveyed in Fort Morgan/Wiggins is much newer, on average built in 2021.

Inventory increased by 24 units in 2Q 2024 and 16 units in 4Q 2024 because more units were completed and leased.

#### **Additional Notes**

Other

It should be noted that, while Basalt and El Jebel are technically in Eagle County, for purposes of this Survey, properties in these towns have instead been included in the Glenwood Springs geography because they have a greater impact on housing in the Glenwood Springs housing market than the housing market in Eagle County. Further, the Survey does not include any properties in Aspen/Snowmass, as the significantly higher rents in those areas would reduce the usefulness of the data for the remainder of the Glenwood Spring area.

\$1,095

Studios, and to a lesser degree 1-BD units, in the Glenwood Springs MSA have higher rents than their larger 2 and 3-bedroom counterparts because the newest development in the market largely includes smaller units. Larger units are generally found in older vintage properties.

Newer properties added in 2023 and 2024 increased the average and median rents in the area. Added three new properties (all new construction) with 123 total units to the survey in 3Q 2024, which increased the inventory and further pushed up average and median rents.

#### **Additional Notes**

Vacancy can appear volatile in this market because of its small size (one project with 17 total units being surveyed). As such, it takes only a few units to make vacancy appear high.

#### **Additional Notes**

Vacancy can appear volatile in this market because of its relatively small size (3 projects with 93 total units being surveyed). As such, it takes only a few units to make vacancy appear high.
